SITUATION SUMMARY

Spill Report# 16-0838: Train Derailment, Metro Rail Yard San Francisco, San Francisco County

- On 02/08/16 at 1232 hours, the National Response Center reported that a San Francisco Municipal Transportation Agency (SFMTA) light rail vehicle derailed and collided with another light rail vehicle that was beside it within the Metro Rail Yard in San Francisco, San Francisco County. There was no hazmat release and no injuries due to this incident. Notifications were made per SOP.

Weather of Concern

Northern California

- A high pressure ridge will build over Northern California bringing temperatures 10° to 20° warmer than normal

Southern California

- Santa Ana Conditions will weaken tonight through Tuesday afternoon, but light offshore winds are expected to persist through Wednesday
- Northeast winds are expected to gust up to 70 mph across the mountains, Ventura Valleys and Santa Clarita Valley, and up to 50 mph for the coastal and remaining L.A. County valleys

Active Weather Warnings, Watches and Advisories by County:

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought
- Humboldt County has submitted a Drought Proclamation Termination Resolution. The situation that resulted from the drought conditions is now deemed to be within control of the County.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA

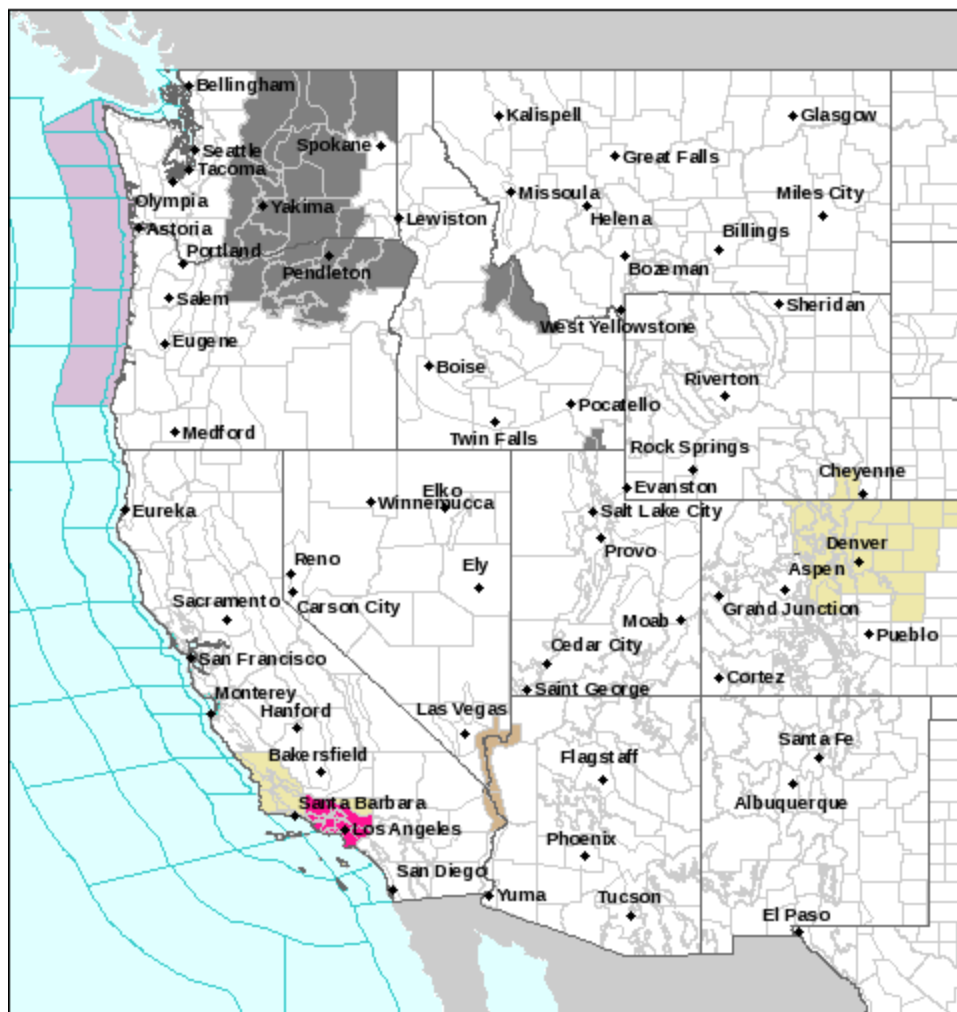

Strong high pressure with near-to-record afternoon temperatures will be in place again today. Afternoon max temperatures will be on the order of 20 degrees above normal today, much like Sunday's were. Over the next few days, the current, strong high pressure ridge will weaken somewhat as the eastern edge of a massive Gulf of Alaska trough exerts some influence on the ridge. The trough will struggle to do more than send a few high clouds and somewhat cooler temperatures our way, however, until perhaps late in the week when a bit more cloudiness arrives and maybe even some precipitation for the far northwest areas Friday night. Otherwise, expect a continuation of dry mild weather through the 7 day period. Dry, gusty North to East foehn winds are expected to continue through early afternoon Tuesday, then develop again over the weekend. Some areas will have rather low afternoon relative humidity (RH) and quite poor overnight RH recovery as a result, especially compared to normal February conditions.

SOUTHERN CALIFORNIA

Offshore winds of 20 to 30 mph with gusts to 50 mph will surface across the mountains and below the canyons and passes of Southern California through early this afternoon as strong surface high pressure sits over the Great Basin. The surface high will start to weaken later this afternoon causing winds to lighten to 15 to 25 mph with gusts to 40 mph through early Tuesday afternoon. Winds will become light Tuesday evening through Saturday as surface pressure gradients become flat. A strong ridge of high pressure aloft will cause temperatures to be 10 to 20 degrees above normal through Tuesday. Maximum temperatures will be in the upper 50s and 60s across the mountains to as warm as the 80s to low 90s across the lower elevations of Southern California. Temperatures will cool a couple degrees each day Wednesday through Friday as the strong ridge aloft slowly weakens. Minimum humidity will be mainly in the single digits and teens away from the San Joaquin Valley through the end of this week. The coolest day along with the highest humidity will be Saturday as a trough moves inland into the Pacific Northwest. However, temperatures will still be 5 to 10 degrees above normal and minimum humidity away from Central Valley will only climb to between 15% and 30%. Another ridge of high pressure aloft will build into California from the Pacific bringing warming and very low humidity to the region starting Sunday. Surface high pressure will strengthen over the Great Basin bringing gusty offshore winds to Southern California once again Sunday into early next week.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on the first Wednesday of each month.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

Local Emergency Proclamations:
